

FOR PROFESSIONAL USE ONLY

Concentrated Product

Dilute Before Using

Regular Truck-Mount Injection

Cleaning equipment with gph flow meter system. Use 1 pint (.125 gal.) LIQUID 500 with 19 ¼ quarts (4.625 gal.) water to make 5 gallons of concentrate to be metered through your unit at between 3 and 6 gph depending on the soiling conditions.

Full Concentrate Injection:

Cleaning equipment with cc/h flow meter system.

Use LIQUID 500 concentrate straight from the container metered through your unit at 15 to 30 cc/hr depending on the soiling conditions.

Portable Equipment:

Cleaning equipment with no chemical metering system.

Use 1 oz. of LIQUID 500 to each gallon of water.

LIQUID 500

Instant Action Emulsifier

CONCENTRATED CARPET FORMULA

DILUTED pH 9

California Orange Blossom Essence

CAUTION: Keep Out of Reach of Children

DO NOT TAKE INTERNALLY

1 Gallon (3.78 Liters)

LIQUID 500 Instant Action Emulsifier is designed for efficient economical use in all types of injection-extraction style carpet cleaning equipment. LIQUID 500 mixes instantly in hot or cold water for easy dilution. LIQUID 500 meets all published requirement to be chemically compatible with all major carpet fibers, including advanced generation Stain Resistant nylon. Powerful penetrants, suspension agents, brightener, and fragrances have been combined to leave carpets clean, bright, and fresh smelling. Unbelievable cleaning power in an economical, easy to use liquid - LIQUID 500 Instant Action Emulsifier.

NOTE: Stain Resist Fibers should be cleaned with solution at or below 150 F regardless of equipment. (Truck Mount or Portable).
