

1. Spray or wipe CITRA CLEAN - A on surface to be cleaned.
2. Allow contact with surface 5 to 10 minutes depending upon residues to be removed.
3. Flush off with water. Heavy residue can be wiped off and then flushed with water. For large applications, a high pressure spray can be used.
4. Apply second application if needed for complete removal of residues.

HOW TO THICKEN WITH WATER:

- A. Pour CITRA CLEAN - A into a bucket.
- B. While stirring, add water until solution turns a peach color and becomes a thicker, creamy consistency.
- C. Optimal thickening occurs when approximately 20% water has been added. (1 part water and 4 parts CITRA CLEAN - A). Adding more water will eventually thin down the solution.

As CITRA CLEAN - A is mixed with water it still is an effective cleaner and can be used for daily maintenance to keep tar and other residues to a minimum level.

CITRA CLEAN - A

Water Soluble Neutral Solvent Cleaner

Effectively Removes
Asphalt * Tar * Oil * Petroleum Residue

Contains Citrus extracts and Biodegradable Detergents

CAUTION: Avoid contact with eyes. In case of contact with eyes, flush with water. Wear rubber gloves for sensitive skin or prolonged use. As with all professional cleaning products, wash with soap and water all skin exposed. KEEP OUT OF REACH OF CHILDREN.

1 Gallon (3.78 Liters)

CITRA CLEAN - A is an environmentally safe and natural solvent cleaner. This product contains no petroleum distillates, methylene chloride, chlorinated solvents or phosphates. It can be sprayed or applied manually. One of the unique characteristics of CITRA CLEAN - A is that it can thicken with water for easy application to vertical surfaces. Dilution up to 20% (1 part water and 4 parts CITRA CLEAN - A) with water will provide a cleaning solution with only a minor reduction in cleaning efficiency and considerably less waste. Dilution with water up to 50% can be effectively used to remove light oil and asphalt coating when allowed more contact time before rinsing. CITRA CLEAN - A is the most effective asphalt, tar, oil, and petroleum residue remover on the market today.
