

FOR PROFESSIONAL USE ONLY  
Concentrated Product - Dilute Before Using

#### URINE PRE-TREATMENT

Concentrated Product - Dilute Before Using. After diluting, use a sprayer to apply UPT EXTRA to all affected areas. Apply solution liberally wherever urine concentration is high.

UPT EXTRA is effective in preparing urine-soaked carpets and upholstery for thorough cleaning, the most basic step in deodorization.

How it works: UPT EXTRA contains specialized surfactants which are effective at solubilizing nitrogenous wastes of urine. These wastes can then be rinsed out of the carpet or upholstery. The acidic nature of UPT EXTRA prevents the production of ammonia gases and reactivation of the urine odor which takes place in conventional methods.

# UPT EXTRA

## One-Step Urine Pretreatment

NEUTRALIZES URINE, AMMONIA  
AND ODOR  
CAUSED BY BACTERIA AND FUNGUS.  
FAST PENETRATION

Acidic Product - pH 3.0 (Diluted)  
NET CONTENTS: 1 Gallon (3.78 Liters)

CAUTION: Keep Out of Reach of Children  
see side panel for additional precautions

#### DIRECTIONS

**CARPET:** UPT EXTRA is effective in cleaning urine-soaked carpet and upholstery. Apply product to the entire affected area, allowing 10 to 12 minutes and extract with warm water.

Repeat if necessary. UPT EXTRA should be diluted before use. Mix one part with 5 parts water. In extreme conditions, mix one part with two parts water.

**KENNELS Hard Surface:** Dilute one part with 20 parts water. Spray the affected area and allow 15 minutes before washing away.

**Special Treatment:** In special circumstances, UPT EXTRA may be used as strong as half and half with water. In no instances should it be used stronger than this.
