

FOR PROFESSIONAL USE ONLY

DIRECTIONS FOR USE

Apply FIBER SHIELD to fabric using a clean sprayer Free of Water. For best results use nozzle with a fan-pattern spray.

Spray FIBER SHIELD directly onto the area to be treated in concentrated form. Do Not Dilute. A nap brush can be used to work it into the carpet and increase effective coverage.

FIBER SHIELD may be applied directly after wet cleaning. If surfaces are not cleaned first then a thorough vacuuming is recommended prior to application.

An application will last approximately one year under normal traffic and soiling conditions. Re-application recommended after each cleaning.

APPROXIMATE COVERAGE: Up to 1000 sq. ft. per gallon on low-napped goods. Thick, long or heavy napped goods may require up to 25% more solution.

# FIBER SHIELD

## ALL-FABRIC PROTECTION AGAINST SPILLS, SPOTS, STAINS

CONTENTS COMBUSTABLE - CONTAINS PETROLEUM DISTILLATES

Keep away from heat, sparks, and open flame. Do not spray near pilot lights. Use only with adequate ventilation. Avoid prolonged breathing of vapor or contact with skin. Do not take internally. If swallowed do not induce vomiting. Call a physician immediately. Keep away from children. Close container after each use.

NET CONTENTS: 1 Gallon (3.78 Liters)

### FIBER SHIELD

All-fabric protection against water-based spots, spills and stains. Dries clear without dulling or darkening of fiber appearance. Easy to apply.

- Superior Stain Repellant
- Faster Drying
- No sticky Residue
- Complete Evaporation

Ideal for use on both carpets and upholstery. Slows resoiling, reduces static attraction of soils and improves subsequent cleanability. Available in gallon and 55 gallon size.
