E B C

E B C Enzyme Bacteria Concentrate is a specially formulated aerobic and anaerobic blend of stable bacillus spore-forming bacteria containing over 256,000,000,000 organisms per gallon. These "friendly" bacteria digest protein, starch, cellulose, detergents, fats, grease and oil. The enzymes included in the formula greatly speeds the digestion.

DIRECTIONS FOR USE:

For waste ponds and lagoons: For every million gallons of effluent per day, meter into the waste stream 2.5 gallons of E B C. Once odor has been controlled, a level of one half to one gallon per million gallons of effluent can be metered in.

For kitchen, laundry and bathroom drains, daily add two ounces E B C for each inch diameter of drain.

For grease traps, wet wells and lift stations, daily add 8 ounces of E B C directly into systems.

For general odor control dilute equally with warm water and apply to kitchens, bathrooms, carpets and rugs. In case of emergency call 1-800-255-3924.

Only for Sale to, Use and Storage by Servicepersons.
