Q G F

This hard, fast drying and fast curing finish provides complete floor protection instantly. Knapp QGF is the first floor finish that truly dries to an instant wet look and is still high-speed buffable. It is not necessary to burnish Knapp QGF to get a wet look, but it can be maintained indefinitely with proper care.

- Exceptionally fast drying for reduced maintenance time.
- Durable and strong with spectacular gloss.
- Excellent for use with super high speed and spray buffers.

Directions and applications: Use a floor stripper to ensure that all old wax, finish, resin and soil have been removed. Using a scrubbing machine with stripping pads will expedite cleaning. Rinse thoroughly and let dry. Using only clean equipment, apply finish in a thin, even coat. Do not rub! Another thin coat is recommended for added gloss and protection. Allow 15-20 minutes for drying before applying a second coat.

Maintenance: Daily cleaning: Sweep as necessary to remove gritty soil. Dirty Floors: Clean with a neutral floor cleaner.

First Aid: Avoid contact with eyes. For eye contact, flush with water repeatedly. If accidentally swallowed, DO NOT induce vomiting and contact a physician immediately. Please refer to the Material Safety Data Sheet for detailed safety information and procedures. For emergencies, call 1-800-255-3924.

Only for Sale to, Use and Storage by Servicepersons.
